Erasmus+ IoTrain Project Meeting and Events

Industry Exploitation Workshop, Entrepreneurship and Dissemination Workshop and Contirum Meeting

September 25th-29th, 2023

Host: Islamic Azad University - Quchan Branch (IAU)

Meeting Location: The central office of Institute for Advanced Studies in Basic Sciences Tehran, Iran

The IoTRAIN partnership with support of the European partners drives innovation, modernization, and synergistic cooperation among Iranian and Iraqi HEIs in the field of Internet of Things (IoT). In the frame of the IoTRAIN project, the Islamic Azad University organizes entrepreneurship and dissemination workshop and industry exploitation workshop collocated with the project review meetings, 25th-29th September 2023, in Tehran, Iran, creating an opportunity for Iranian and Iraqi Higher Education Institutions (HEIs), research centers, training institutes, industries, and stakeholders to collaborate. Dissemination and entrepreneurship workshop bring Iranian and Iraqi HEIs, research centers and training institutes together, ministries of higher education in order to learn more and in details about the project, its goals, activities, experiences, outcomes and results.

The goal of these workshops is to gain insights into how IoT can revolutionize academic and industrial sectors, fostering growth, efficiency, and innovation. This event is a special event that considerably strengthens the link between HEIs, business sector, and startups and paves the way to the modernization of Iranian and Iraqi HEIs. Keynote speakers are invited to present their best practices and strategies in successful establishment of start-ups in the field of IoT. Moreover, the Ministry of Science, Research and Technology (IMSRT) and ministry of higher education in Iraq are invited to provide their perspectives on the new program, Internet of Things. IMSRT is a responsible ministry for HE in Iran and a similar ministry from Iraq. This will multiply the outcomes and effects of this event towards achieving its goals in disseminating the project and exploiting its results in modernization of HE trainings in the domain of IoT.

Additionally, other training organizations, VET providers, Chamber for Commerce and Industries, as well as Technical and Vocational Training Organizations (TVTO) are invited to this event. The experts and keynote speakers from academia and industry highlights the know-hows in getting benefit from IoT solutions in advancement and development of their research and development.
